Steps to activate Adobe Flash Player on a site:

1. Go to the site you want Flash to run on
2. Click the lock or information (i) on the top left of the URL

3. Click Site Settings

4. It will open a new tab called Setting, scroll down and find Flash, it is likely to be the item #6 from the top

5. To right of Flash, click Ask, and then click Allow

6. Close the Settings tab and refresh the site you want Flash to run on
